

Improving Transit Services

Big Stone • Chippewa • Lac qui Parle • Swift • Yellow Medicine

Prairie Five Community Action Council and the Upper Minnesota Valley Regional Development Commission are working with stakeholders to form a Regional Transportation Coordinating Council (RTCC) to coordinate all transportation services including:

**Private & public buses || Cars/volunteer drivers || Vans || Medical rides
Veteran's Affairs rides || Nursing home rides || etc.**

Creating an RTCC to Meet Needs:

Having an RTCC will help to make using transit easier, consolidate resources, provide more rides, and reduce barriers to the programs riders and providers depend on.

Providing transit services in rural communities is extremely challenging. Even with the generosity of residents, the services provided by public and private transportation companies, too many people are not getting the rides they need.

To give feedback on the project or get more information visit the UMRDC website.
