When Tyler and Kelsey Donner transitioned Tebben Enterprises Inc and CC Powder Coating in Clara City and created Donner Manufacturing Inc., they were looking forward to using Tyler’s past experiences and passion for manufacturing to build quality products, provide jobs, and support the local community. Donner Manufacturing makes and sells agricultural equipment, recreational products, and attachments. Some of the products they manufacture include Land Rollers, Deep Till, Skid Steer and Mini Skid Steer Attachments, Scissor Lift and Bunk Pontoon Trailers, and Fish House Frames. Their retail network is primarily located in the Midwest and Canada, and they have dealers and distributors in over 20 states. They also provide powder coating services under CC Powder Coating.

Tyler has a passion for owning his own business in his hometown of Clara City. He enjoys watching the business grow and being able to provide quality jobs to the community. His continued dream for the business is to develop new products, build on to the existing products, update the facilities, multiply company revenue, and hire more employees. He currently employs 15 people.

When asked what advice he would give to other young entrepreneurs he said, “Do as much networking as possible and get to know as many people in the industry as you can.”

The UMVRDC Revolving Loan Fund provided Tyler with the necessary funds to make his dream a reality and continue on with the new business from the old.
